

BERTHELIN Yohann

+33 6 51 91 85 34 | yohann.berthelin@cnrs.fr | Date of Birth : 04/12/2001 | Car and boat licenses

Academic background

Recognised PhD student in quantitative macroeconomics | *Oxford University, England* 2025 – 2026
Supervisors: Pr. Andrea Ferrero (former FED & ECB economist).

Modelled theoretically and empirically the transmission of environmental shocks to polluting and non-polluting capital allocation via macroprudential policy responses, with implications for commodity-intensive sectors across heterogeneous Euro Area economies.

Visiting PhD student in econometrics | *London School of Economics, England* March 2026
Supervisors: Pr. Frank Venmans.

Built a multi-source econometric pipeline combining climatic, satellite, financial and micro-level data to estimate the impact of agri-environmental policies on vegetation outcomes across French regions, using Panel VAR, Granger causality and GARCH modelling.

PhD student in macroeconomics and econometrics | *CNRS, France* 2024 – 2027
Supervisors: Dr. Lise Clain-Chamosset-Yvrard & Pr. Dramane Coulibaly.

Research combining theoretical modelling (DSGE/RBC/IAM) and empirical econometric analysis to examine structural change, environmental transition dynamics and environmental macroprudential policy design, with applications for both fundamental macro analysis and systematic data-driven approaches.

Mathematical tools:

Stochastic process modelling, constrained optimization, linear algebra, probability, DSGE/RBC/IAM calibration, time series analysis (ARMA, VAR, GARCH, filtering and stationarity techniques)

Programming skills:

Python: pandas, numpy, scipy, statsmodels, matplotlib, seaborn, quantecon - Linux command-line environment.

Data:

Satellite, climate, financial, capital pollution, energy, structural, macro and micro data, trade flow.

Msc Economics & Finance – Master in management | *EM Lyon Business School, France* 2023 – 2024
Top of the class with highest honor (17/20) - Research Master in Quantitative Macroeconomics and Econometrics

Professional experience

Louvre Banque Privée **Paris, France**
Multi-management UCITS analyst (portfolio manager) on a 11 billions € portfolio April 3, 2023 – August 31, 2023

Built quantitative tools in Python for fund selection on an €11bn portfolio including Monte Carlo simulations, VaR, tracking error analysis and backtesting.

Developed a VBA classification system across 56 fund classes by style, geography and category.

Attended institutional conferences (Goldman Sachs, Fidelity, Amundi, AXA IM) covering macroeconomic trends and fund strategies.

Nexum Real Estate Intelligence **Lyon, France**
Founder Since April 2026

Designed and backtested a systematic signal extraction framework on 10 year real estate transaction datasets, yielding robust out-of-sample performance (AUC 0.78, lift D1 2.5x) using Python. Translated model output into actionable signals for real estate agencies.

Wylensol® App **Lyon, France**
CEO and founder of the IOS Application Wylensol® App Since July 2023

Solo-developed and published an iOS application (~20,000 lines of code). Management of the full entrepreneurial lifecycle from technical development to legal structuring, institutional partnerships and commercial deployment.

Distinctions :

Centre des professions financières **Paris, France**
Nominated for the 36th “Mémoires de l'économie et de la Finance” international competition (prestigious French Economics & finance research competition). 2025

Volunteering

Personal Projects in Commodities
Developing independent Python-based commodities research projects, including a tanker tracking model in the Strait of Hormuz with implications on physical trade and oil price, and an electricity market pricer.

WWF – Volunteer since June 2022

International Experience - Volunteer in Ireland at an educational farm (16/07/2022 – 6/08/2022)

Personal Project (in conjunction with the École Centrale de Lille)
Implemented an image classification system with Python using TensorFlow, applying machine learning algorithms for pattern recognition.

Languages

French : Native

English : Fluent

Spanish : Intermediate

Interests and hobbies

Swimming in competitions for 10 years

Animals and nature

Reading and travel

IT Skills

Excel – Word – Powerpoint

Python – VBA – Swift

SQL - Firebase
